

Vision & Mission

Vision of TURKLAB

TURKLAB represents and supports the Turkish testing and calibration laboratories, conformity assessment bodies, nationally and internationally and will be the core organization for sectorial information and education.

Mission of TURKLAB

TURKLAB's mission is to establish networks and working groups for laboratories and conformity assessment bodies in Turkey for national and international information exchange, enhance relations with EUROLAB organizations, increase the number of members .

EUROLAB MEMBERSHIP

Subject: Affiliat EUROLAB Membership

Dear Mr. Güzel,

We are glad to confirm again that the EUROLAB General Assembly approved the application of TURKOLAB for affiliate membership in EUROLAB and welcomed TURKOLAB in its community. Now we are looking forward to a good cooperation in the future. Please feel free to contact us in the case of questions or if you need any support.

Looking forward to hearing from you and send regards

Dr. Manfred Güler
 EUROLAB Secretary

Draft minutes of the EUROLAB Board of Administrators' meeting in Brussels on September 2, 2006

Participants: Jean-Luc Laurent (Chair), Jean-Marc Aublant (minutes), José Luis Sanchez Alvarez-Campans, Jan Basten, José Duarte, Manfred Hennicke, Guy Jacques, Jiri Bokala, Zbigniew Dobrowicki

	Actions
1. Welcome and practical arrangements Jean-Luc Laurent welcomed the Board members at the EARTO premises in Brussels. He informed them that EARTO will move to 35-38 rue Joseph II at the end of the month (September 30, 2006). The next board meeting in Brussels will probably be convened there.	
2. Approval of the agenda The agenda (EL/07-02/08227) was approved.	
3. Approval of the minutes of the last meeting The minutes of the last meeting in Paris (EL/07-02/08232) were approved.	Secretariat: Puhon minutes 01-07-2008232 Date agreed by: Jean-Luc Laurent
4. EUROLAB membership issues Election to the Board of a representative of Associated members Jean-Marc Aublant reminded the matter raised at the last General Assembly in Paris regarding the election of the representative of the associated members to the board. He reminded the actions done by the Technical Secretariat in the meantime. 3 associated members had been identified and confirmed as such, i.e. Turkolab from Turkey, Crotab from Croatia and Hmt from Croatia. A call of candidatures had been opened. Each organization had designated a candidate and had voted for its own candidate. Jean-Marc Aublant requested the arbitration of the Board before any further action. After a five reading and analysis of the EUROLAB's statutes the board members discussed the matter and how to improve and clarify the situation and the statutes to avoid any new misinterpretation. Thus the board members unanimously decided that: - the representative of the associated members to the board should be Dr. Cengiz Güzel from Turkolab for a two-year term starting in April 2006. - the statutes of EUROLAB will be clarified and rewritten if necessary not to admit more than one legal not-for-profit entity constituted under the laws and regulation of its country of origin / its country home countries being eligible to the European union or EFTA II	Secretariat: Prepare the ballot with 3 candidates and four seats Secretariat: Register and make any modifications related by the signature of José Luis Sanchez Alvarez-Campans

The EUROLAB "Cook Book"

A compilation of short documents on Quality issues for laboratory practitioners

This Cook Book contains a set of informal EUROLAB documents intended to assist laboratories in their efforts to comply with the requirements of the ISO/IEC 17025 standard. They are based on experience and expertise developed in the EUROLAB TQQA, but they are not in any way formally endorsed and issued as formal policy. Comments or any other feedback should be addressed to the TQQA Secretariat at sam@eurolab.de.

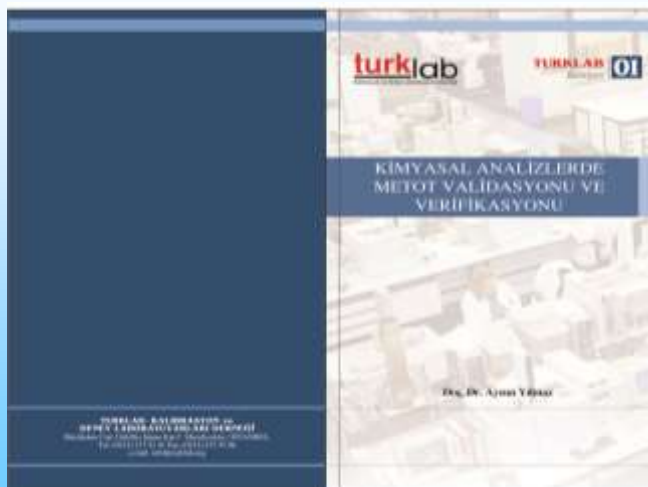

Cook Books

Today, the EUROLAB Cook Book series comprises the following documents which are ready for publication*:

- Validation of test and calibration methods
- Criteria for the selection of a proficiency testing scheme
- Use of interlaboratory comparison data by laboratories
- Handling of untestable samples
- Management review in laboratories
- Conflict handling within the accreditation process
- Competence of personnel
- Determination of conformance with specifications or limiting values with particular reference to measurement uncertainty – possible strategies

Turklab Publication Method Validation & Measurement Uncertainty

National Members' Meeting, 08th October 2012, NPL, Teddington

The European Federation of National Associations of Measurement, Testing and Analytical Laboratories (EUROLAB) held its well-attended National Members' Meeting on 08th October 2012 at the National Physical Laboratory in Teddington, UK.

The delegates from 19 countries gathered at the EUROLAB National Members' Meeting to discuss current developments within the Federation and laboratory sites.

Jiř Sobota, EUROLAB president, outlined the main achievements in the last couple of years with reference to the EUROLAB strategy 2009 – 2013. The President highlighted the efforts of the EUROLAB Technical Committee for Quality Assurance in Testing and Calibration, chaired by Manfred Oubon, in its support for the technical work of the Federation. In addition he emphasised the improvement of communications as well as the increase of EUROLAB's international influence through vital cooperation with other stakeholders.

EUROLAB Technical Committee on Quality Assurance in Testing and Calibration (TCQA)

The TCQA meeting was held on 08th October 2012 in Teddington chaired by member of the Board of Administration Manfred Oubon and Vice-Chair Jackie Vickers-Saiz. The meeting brought together a remarkable number of regular committee members as well as invited guests. The discussion covered various issues including the EUROLAB "Cook Book" (the guidelines provided by TCQA on different matters on laboratory accreditation), draft position papers on Opinion and Interpretation in Test Reports and Accreditation and Notification, views and experience of EUROLAB members. The committee members welcomed their guest John van de Kerkhof (JvK) who reported on activities within EDEPT and EA LCRHO I.C. in testing. The TCQA meeting was concluded with reports on potential future activities in terms of preparation of a new strategy. The fruitful meeting was followed by a Gala dinner at Basky House, kindly organised by EUROLAB UK.

CEOC International, IFIA and EUROLAB Position on Product Safety and Market Surveillance Package adopted by European Commission on 13th February 2013

CEOC International, IFIA and EUROLAB welcome the Commission's objective to update product safety and market surveillance rules in the European Union as a key action of the Single Market Act II, adopted in 2012. European consumers, economic operators and authorities need clear, stringent and coherent legislation to face current market trends and ensure free movement of safe goods. Global trade continuously increases, the value chain becomes more global and larger and in addition European consumers profit from a growing choice of products.

In order to establish one single coherent legal framework and to ensure that European legislation can be uniformly applied, CEOC International, IFIA and EUROLAB welcome in particular the European Commission's intention to align the proposal for a regulation on market surveillance of products - 2013/0048 (COD) and the proposal for a regulation on consumer product safety and repealing Council Directive 87/357/EEC and Directive 2001/95/EC - 2013/0049 (COD) with the actual provisions. This is particularly true with respect to definitions and duties for economic operators mentioned in current legislation such as

- the General Product Safety Directive - GPSD (2001/95/EC),
 - the Regulation setting out the requirements for accreditation and market surveillance (765/2008/EC) and
 - the Decision on a common framework for the marketing of products (768/2008/EC),
- and with regard to the distinct provisions concerning controls of products entering the European Union in order to achieve harmonized measures in case of non-compliant products.

To offer the best-possible guarantee for the safety of products and to ensure a level playing field amongst economic operators supplying the European market, market surveillance must be strengthened and equipped with sufficient resources. However market surveillance activities remain reactive measures when products have already been placed on the market. CEOC International, IFIA and EUROLAB endorse the approach that conformity assessment (based on testing) of products, which is conducted already before these products enter the market, is a very effective and preventive means in addition to market surveillance activities. The alignment of the European legislation will also help to give unity to the distinct provisions concerning controls of products entering the European Union.

CEOC International, IFIA and EUROLAB support the European Commission's proposals to use the competence, expertise and infrastructure of conformity assessment bodies (CABs). CABs are very often present all over the world and can thus be used to complement limited resources of public authorities especially in times of financial crisis. Additionally they can support Member States with a view to accommodating the precautionary principle and to protect citizens from risks and harms.
